## Summary

I am an experienced Flutter developer with **over 2.5+ years** of expertise in building high-performance and user-centric mobile applications. Skilled in Dart, I am passionate about crafting innovative solutions that elevate user experiences. I excel in fast-paced environments and am eager to contribute my skills to meaningful projects, collaborating with a visionary team to develop cutting-edge apps.

---

## Skills

Flutter developer, Dart, Node.js, Firebase, C++, Provider, GetX, Third Party Packages, GitHub, OOP

---

## Experience

### FA TECH & SOLUTIONS

Flutter Intern, Faisalabad, Punjab

10/2021 - 01/2022

Enhanced app performance through code optimization, debugging, and problem-solving. Integrated Flutter applications with backend services, ensuring seamless API and database interactions. Worked on diverse projects, including e-commerce, service-based apps, and metaverse solutions.

### FA TECH & SOLUTIONS

Junior Flutter Developer, Faisalabad, Punjab

02/2022 - 11/2023

Gained hands-on experience as a Flutter Intern, independently developing and enhancing mobile applications while taking initiative on key project tasks.

## Projects:

1: **Alaje Connect** is an e-commerce platform designed to help businesses register, showcase their services, and expand their reach. Users can easily discover services based on location, explore detailed offerings, and place orders effortlessly. The app features Firebase for secure authentication and integrates Stripe for subscription management, allowing businesses to provide tiered service plans.

2: **Fitness - Home Workout** is a simple home workout app designed for all fitness levels. Follow guided exercises, no equipment needed, and track your progress easily. Stay active and achieve your fitness goals from the comfort of your home!

<https://play.google.com/store/apps/details?id=com.nhn.fitness>

## Paragon Logics IT & Solutions

Flutter Full Stack Developer

12/2023 - 12/2024

1. Developed a **SwapIt (Ecommerce App Like OLX)** using Flutter and Node.js, allowing users to trade products without money. Integrated Firebase for secure authentication, real-time notifications, and seamless account management. Implemented dynamic search filters, product-based chat, and a custom favorites system for better user experience.

<https://github.com/Paragon-Logics/SwapIt>

2. **ANAD CRM** is a lead management application designed to fetch and organize leads from Facebook and Google Ads. With a Node.js backend and MySQL database, the app efficiently processes and stores lead data, enabling businesses to track, manage, and follow up with potential customers seamlessly.

<https://play.google.com/store/apps/details?id=com.paragon.anad.crm>

3. **Go Duckin App** developed where users post their ducks, and locations are displayed as markers on Google Maps. Implemented secure user authentication with Firebase, allowing users to log in via email. Created an admin panel allowing administrators to block users and manage reported data.

<https://play.google.com/store/apps/details?id=com.paragon.goduckin>

## Accelator LTD

Full Stack Flutter Developer, London, UK

01/2025 - Present

1. Developed **RFK App**, a buy-and-sell platform using Flutter and Node.js, integrating **Stripe** for secure payment processing. Implemented user authentication, product listings, and seamless transactions. Enhanced user experience with real-time updates, dynamic search, and a secure payment system.
